

DISPLAYEDUX

Portfolio Website — Project Handoff v12

Danny Driscoll | March 2026

01. Session Focus

This session added a full-screen photo lightbox to the photography page and deployed it to the live site at displayedux.com. Two files were created or modified. No other pages were changed.

02. What Was Built

New file: components/ui/PhotoGallery.tsx

A new client component extracted from the photography page. It owns the 32-photo grid and all lightbox logic. Marked "use client" so the photography page can remain a server component and keep its metadata export.

LIGHTBOX FEATURES

- Click any photo to open full-screen overlay at rgba(0,0,0,0.92)
- Photo counter top-center: e.g. "12 / 32"
- Copyright credit bottom-center: "© Danny Driscoll. All rights reserved."
- X button top-right closes the lightbox
- Prev/next arrow buttons left and right of center
- Left/right arrow keys navigate; Escape closes
- Body scroll locks while lightbox is open, unlocks on close
- Right-click disabled on every grid photo and on the lightbox image (onContextMenu preventDefault)
- Clicking the backdrop (outside the photo) also closes the lightbox

Modified file: app/photography/page.tsx

The photo grid was removed from this server component and replaced with a single `<PhotoGallery />` import. All other content is unchanged: page text, Carl Zimmer photo, caption, quote, and the Empathique definition block.

03. Current Site Status

Page / Item	Status	Notes
displayedux.com	LIVE	Deployed. All pages building and serving.
Homepage /	DONE	All sections. Light/dark mode confirmed.
Work /work	DONE	Dark mode fix applied. Cards rendering.

About /about	DONE	Bio, stats, skills, interests, photography link.
Photography /photography	DONE	Lightbox live. Right-click protection active.
Contact /contact	DONE	TeleSign wired. Netlify forms working.
Self-Service Portal	PARTIAL	Hero complete. Body sections not built.
Fraud Prevention	PARTIAL	Hero at 0% 60%. Body not built.
Messaging API	PARTIAL	Image paths fixed. Body not built.
Universal College App	PARTIAL	Paths confirmed. Body not built.

04. Deployment

Git repo: github.com/d2driscoA2/product-design-portfolio

Active branch: design-v2

Netlify project: visionary-swan-5893aa

Two files were staged, committed, and pushed:

- components/ui/PhotoGallery.tsx (new)
- app/photography/page.tsx (modified)

Commit message: "Add lightbox to photography page with right-click protection"

Netlify auto-deployed on push. Build passed. Site confirmed live.

05. Next Steps — Priority Order

IMMEDIATE

- Hide or remove the four View case study links on /work — pages are incomplete
- Verify eyebrow labels on homepage and work page have not reverted to blue
- Reduce chevron arrow size sitewide on three-signal links

CASE STUDY BODY SECTIONS — SELF-SERVICE PORTAL FIRST

- Narrative sections with process images from public/images/1-self-service-customer-portal/
- Read time estimate displayed at top of each case study
- Sticky scroll progress bar while reading
- Reflection section
- Next case study navigation
- Repeat for Fraud Prevention, Messaging API, Universal College App

REMAINING POLISH

- Add quantified outcome sub-copy beneath each card title on work grid
- Test contact form on live site with real mobile number for TeleSign verification
- Confirm LinkedIn URL in Footer.tsx matches /in/dandriscoll/
- Upload resume PDF to public/ and wire to nav Resume button

- `og:image` meta tags for social sharing

06. Critical Rules — Never Violate

Tailwind v4

- `tailwind.config.ts` is ignored. Never edit it.
- All tokens live in the `@theme` inline block in `app/globals.css`
- Dark mode: `[data-theme="dark"]` attribute selectors only. Never Tailwind dark: utilities.

File Edit Rules

- Never use `sed`. Use Python string replacement only.
- Cat the file immediately before writing replacement strings.
- Every Python replacement must include a `MISS` branch.
- Always run `wc -l` and `head -5` after writing. Then screenshot before reporting.
- Read before writing.

Netlify Forms Rules

- Detection file must be `public/__forms.html` (double underscore, exactly this name).
- POST target must be `/__forms.html`.
- Never change POST target to `/` — edge runtime will intercept it.

BentoStat Rules

- Use `value`: not `stat`: in data objects.
- `bento` field is `BentoStat[]` always.
- Add any new property to `BentoStat` interface in `BentoGrid.tsx` before deploying.

Command Labels

- `CLAUDE CODE` or `TERMINAL` goes as plain text on the line directly above the code block, never inside it.

Document Output Rule

- Every document must be presented as BOTH `.docx` AND `.pdf` every single time. No exceptions.

07. Critical File Locations

Project root	<code>~/Desktop/Claude/portfolio/claude-written/danny-portfolio</code>
Global CSS	<code>app/globals.css</code> — single source of truth for all theme tokens
Nav	<code>components/layout/Nav.tsx</code>

Footer	components/layout/Footer.tsx
Photography page	app/photography/page.tsx
Photo lightbox component	components/ui/PhotoGallery.tsx
Contact page	app/contact/page.tsx
TeleSign API route	app/api/telesign/route.ts
Case studies data	lib/case-studies.ts
BentoStat interface	components/ui/BentoGrid.tsx
Case study template	components/ui/CaseStudyTemplate.tsx
Netlify forms file	public/___forms.html
About page	app/about/page.tsx
Env vars	.env.local (never commit)
